EATON

Powering Business Worldwide

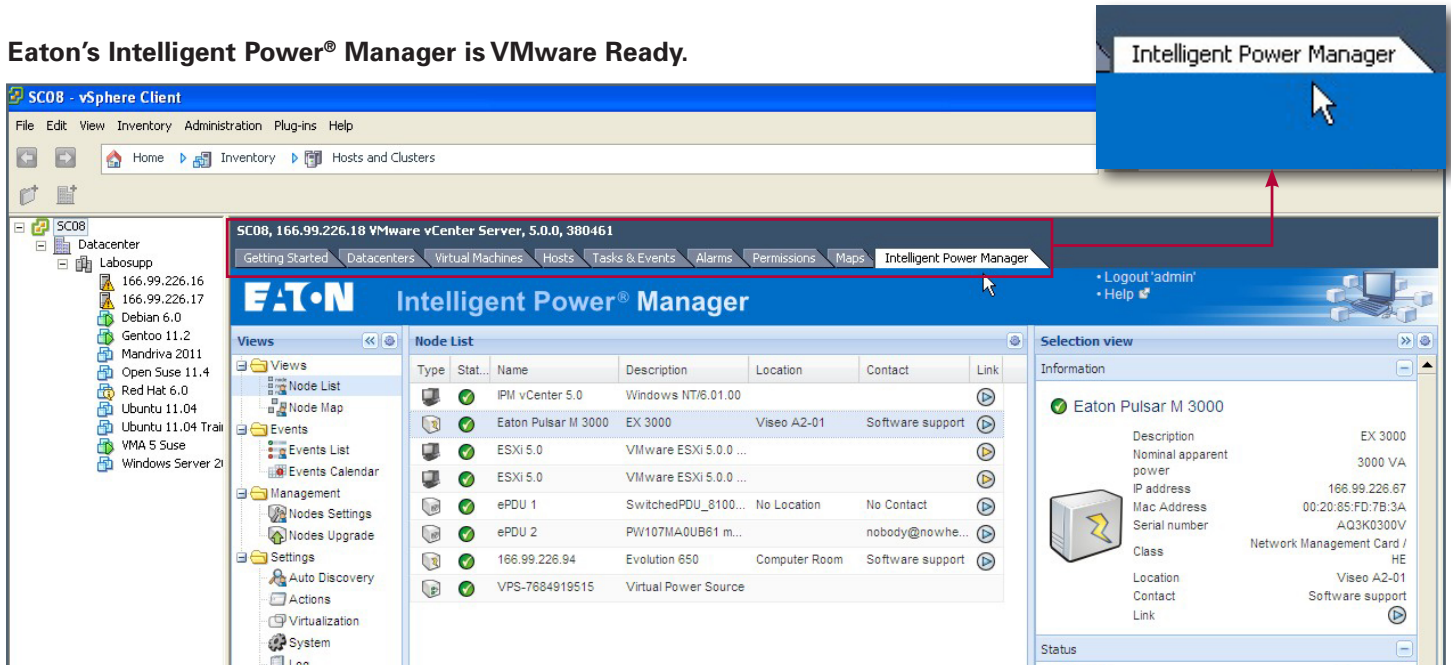

Real power for virtualization.

Eaton is dedicated to making your work life easier by providing the tools you need to manage your power and equipment all from your VMware® vCenter portal.

How Eaton fits into the virtual landscape

Eaton's solutions integrate seamlessly into VMware's vCenter dashboard. Not only do our products solve your power problems with both the reliability and flexibility you require to adapt to an ever-changing virtual infrastructure, but we also back up those products with software that expands the capabilities of a virtual environment — creating a strategic, maximized asset.

Eaton's Intelligent Power® Manager is VMware Ready.

Eaton enables the following through vCenter:

	Eaton capabilities
Measure power consumption	✓
Receive real-time notification of power outages	✓
Plug in to VCenter for ease-of-management	✓
Shutdown a host in a cluster without the need to install agents on each host	✓
Extend battery runtime by consolidating VM's through vMotion	✓
Provide disaster avoidance using VMware's Site Recovery Manager	✓
IPM is available as a virtual appliance	✓
Manage power for virtual desktop infrastructure	✓
Cost	Free up to 10 power nodes - unlimited VMs

Did you know?

Eaton is the first UPS manufacturer to:

- Plug into a virtual management system
- Trigger live migration
- Remotely shutdown a host in a cluster
- Initiate a planned migration to a back-up cloud site with no data loss

Eaton also:

- Offers Cisco Energywise Certified products
- Offers open-source solutions
 - Key contributor to NetworkUPS tool project (NUT)
 - Open Virtualization Alliance member
 - Eucalyptus and Debian partners
 - NetApp cloud management partner
