

AXESS® AUTO TONER FULFILLMENT (ATF)

SIMPLIFIED, STREAMLINED TONER FULFILLMENT

Axess® Auto Toner Fulfillment (ATF) is the complete and simple answer to complicated and costly supplies replenishment for your customers' print devices.

The Axess® ATF system automates toner fulfillment, eliminating manual ordering and tracking for MPS. Additionally, ATF provides proactive communications to ensure users receive notifications of low levels and when supplies are shipped. Seamlessly integrated into the comprehensive Axess® MPS program, ATF helps dealers deliver more profitable and easier to manage MPS solutions.

BENEFITS OF AUTO TONER FULFILLMENT:

- Automatic ordering, shipping, and delivery of toner saves customers money by eliminating "rush" or overnight orders
- No ordering errors; customers receive the right consumables every time
- ATF software is fully integrated with our hosting Axess® MPS remote monitoring platforms, PrintFleet® and FMAudit®. In addition, we can pair ATF with your own RMS server
- Simplifies and streamlines the supplies ordering process
- Just-in-time ordering enables better use of working capital and enables customers to reduce their supply inventory
- Eliminates the complexity of MPS device location movement
- Increased profitability by reducing administrative expenses and reducing errors related to supplies fulfillment

HOW AXESS® ATF WORKS

DATA COLLECTION SERVICE

- Intelligent software application installed at customer's site
- Collects supply levels and page counts from print devices

AUTO TONER REPLENISHMENT

- Supplies orders are automatically created when the device reorder threshold is met
- System algorithms analyze a variety of variables to determine when a toner cartridge needs replenishment

COMMUNICATION

- Device status and location e-mail communication is sent automatically to ensure customer receives the right consumable at the right location, user and device, every time
- ATF communication provides confidence and accuracy
